Configuration

The data entity refresh needs to be executed to update the changes to entities and use new entities in D365 FO DMF

Functionality

To support customers in Data migrations, Extracting data and in some cases bulk update information we have extended our support of data entities available for Axtension products. The entities listed below is what is currently available and from time to time changes will be applied to these entities as new features are released. The main purpose of these entities is to support data extract scenarios and migrating configuration and master data. The possibilities for Open in Excel are limited and there are currently no plans to extend the availability at this point in time. This is due to the complexity in validation required

List of odata entities

The odata entities are created for data extracts.

- AXTpcc_BudgetProject
- AXTpcc_BudgetAdjustment
- AXTpcc_Budget
- AXTpcc_BudgetVersion
- AXTpcc_ProdBudgetSpec
- AXTpcc_ProgressDetails
- AXTpcc_ProgressMaster
- AXTpcc_ProgressProdDetails
- AXTpcc_ProjectPurchOrderLine
- AXTpcc_ProjEmplTransCBS
- AXTpcc_ProjItemTransCBS
- AXTpcc_ProjTransCBS
- AXTpcc_VTSVendPackingSlipTrans
- AXTvp_FinishedProductionOrder
- AXTvp_ProjectActivities
- AXTvp_smmActivitiesEntity
- AXTsctrl_ShipmentDefinition
- AXTpcc_AdjustmentRequestTypes

- AXTpcc_CBSTemplateStructure
- AXTpcc_CBSTemplate
- AXTpcc_IndCostsBudgetRulesTemplate
- AXTpcc_BudgetProgress
- AXTpcc_BudgetProject
- AXTpcc_BudgetVersionAllLines
- AXTpcc_BudgetVersionLines
- AXTpcc_HierarchyTreeTable
- AXTpcc_ItemRequirementCBS
- AXTpcc_ItemRequirementInvoicePO
- AXTpcc_MostActualProgressSetByBudgetAndPeriod
- AXTpcc_ProjCBSCode
- AXTpcc_ProjectInvoicedNow
- AXTsccp_ShipmentStatusUpdateRequest
- AXTvp_AppActivityCollaborationResourcesView

List of DMF entities for Parameter configuration

The purpose of these entities are to support configuration efforts when migrating configuration between environments and other legal entities

- AXTvp_PropertyValueRoute
- AXTvp_ParametersEntity
- AXTvp_GanttColor_ProjEntity
- AXTvp_TaskDataConfigurationEntity
- AXTvp_ControlTableDefinitionEntity
- AXTvp_ItemRequirementsProjectGroupSetupEntity
- AXTvp_ProdJobPrioritySetupEntity
- AXTvp_PropertyTableEntity
- AXTvp_PropertyValueEntity
- AXTvp_ProdStatusSetupEntity
- AXTvp_PropertyValueRouteEntity
- AXTvp_ItemGroupItemTrackingSetupEntity
- AXTpcc_ETCCalculationConfigurationEntity
- AXTpcc_ItemExpenseWBSDistributionsEntity
- AXTpcc_ProgressCalculationConfigurationEntity
- AXTsc_ParametersEntity
- AXTsc_PackageEntity
- AXTsccp_CarrierEntity
- AXTsccp_CarrierServiceEntity

- AXTsctrl_Parameters
- AXTsctrl_NotifyUser
- AXTsctrl_ContainerPropertyDefinition
- AXTpcc_CategoryTableDefaultUnitEntity
- AXTpcc_CostTypeTableEntity
- AXTpcc_ParametersEntity
- AXTvp_GanttColorEntity
- AXTvp_ProjParametersEntity
- AXTpcc_ProgressColumnSetupEntity
- AXTpcc_CostTypeSharedEntity
- AXTvp_GanttColor_ProdEntity

List of changes to standard D365 data entities

Data Entity	Fields added
Purchase order lines V2	CBS Code is added to the entity for Import/Export
Project expense journal lines	CBS Code is added to the entity for Import/Export
Project item journal lines	CBS Code is added to the entity for Import/Export
Project hour journal lines	CBS Code is added to the entity for Import/Export
Released product V2	Production Colors on the release product for Import/Export
Sales order header V4	Shipping Connect related fields for Export only
Purchase order headers V2	Shipping Connect related fields for Export only
Customers V3	Shipping Connect related fields for Import/Export
Vendors V2	Shipping Connect related fields for Import/Export

Exceptions

Cost Control budget lines

The cost control budget lines are not available as odata or DMF data entities. The current solution to import budget lines uses a specific table for validation and cannot be extended to the DMF framework.
