Axtension® Production Planning

New schedule mode: Related orders

A new schedule mode is introduced in the resource planning of Axtension® Production Planning: Related orders.

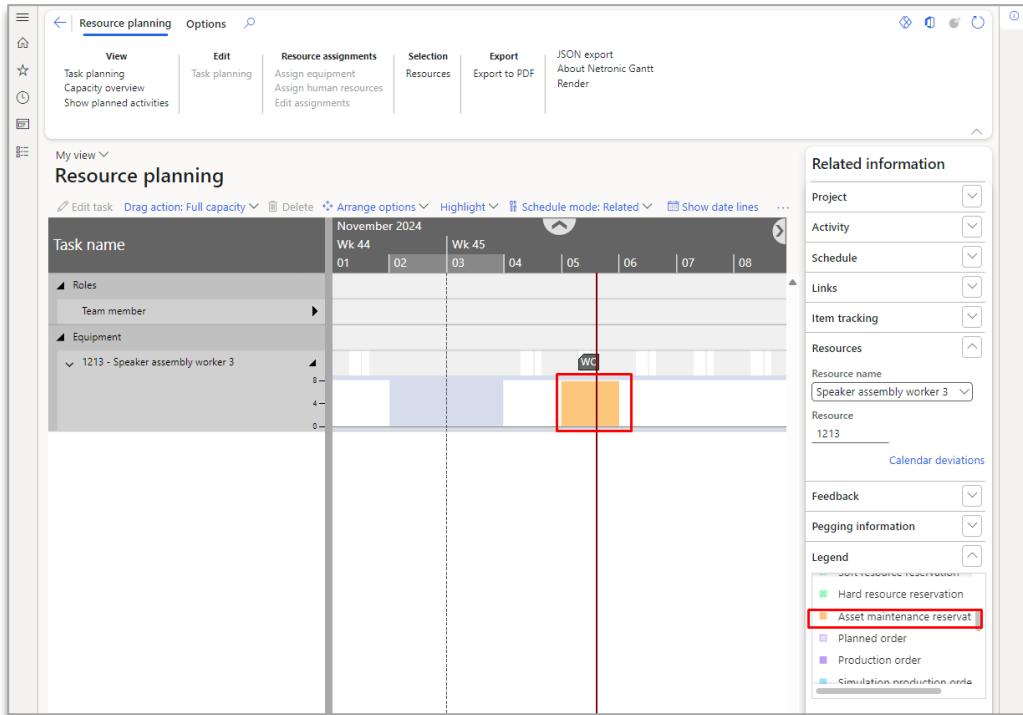

The screenshot shows the Axtension Production Planning interface. The top navigation bar includes 'Resource planning', 'Options', and a search icon. Below the navigation is a toolbar with 'View' (Task planning, Capacity overview, Show planned activities), 'Export' (Export to PDF, JSON export, About Netronic Gantt, Render), and a refresh icon. The main area is titled 'P000435 : MidRangeSpeaker | My view ▾' and 'Resource planning'. It features a toolbar with 'Edit task', 'Arrange options', 'Highlight', 'Schedule mode: Individual' (which is currently selected), 'Show date lines', 'View options', 'Planning actions log', 'Filters', and 'Preferences'. The main grid displays 'Name' (Equipment: 1110 - Cabinet polishing), 'Order' (0), and 'Schedule mode' (Individual, Order, Related orders, with 'Related orders' highlighted by a red box). The timeline shows weeks Wk 41 (06 to 19) and Wk 42 (13 to 19).

Selecting this scheduling mode will not only reschedule the selected operation(s), but also all related production orders based on 1 to 1 references. Partially marked production orders will not be rescheduled with this mode.

Visualize Asset Management reservations

Scheduled work orders from the Dynamics 365 Asset Management module on production resources is visualized in the resource planning. The capacity allocation is displayed in yellow.

By enabling the option “Show projects” in the chart preferences, the work order is shown in the resource planning.
