Axtension® Project Management

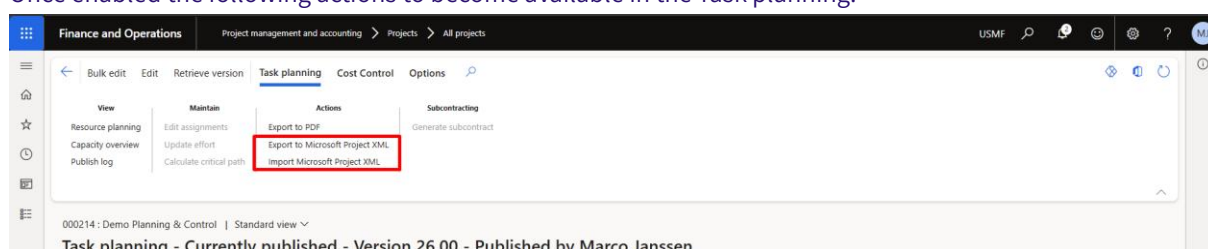

Export and import MS Project XML files in Task planning

A preview functionality has been released which allows to export and import MS Project XML files in the task planning of Axtension® Project Management.

Enabling this preview feature can be done via feature management in Dynamics 365.

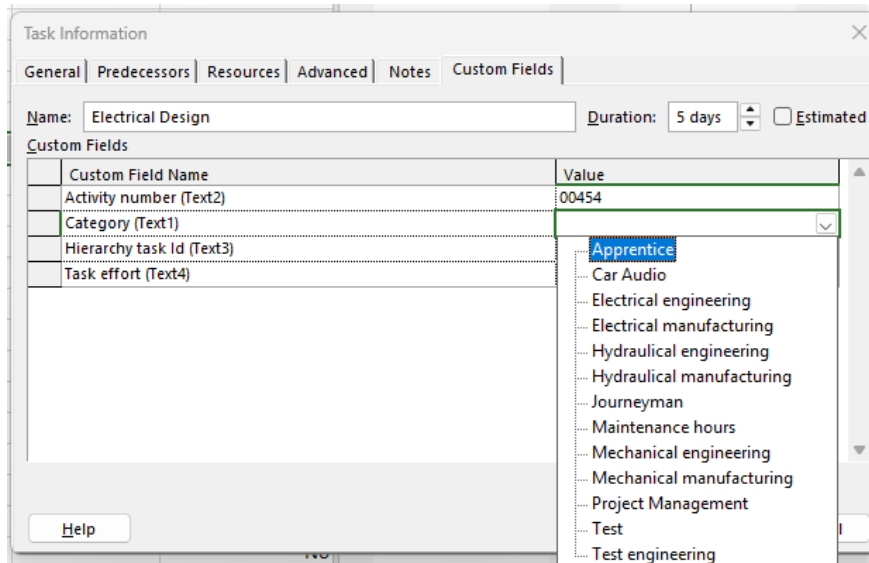

Once enabled the following actions to become available in the Task planning:

Action	Description
Export to Microsoft Project XML	<p>This action will export the WBS to a MS Project XML format, which can then be imported in MS Project. The file will contain the following data from the task planning</p> <ul style="list-style-type: none"> - Task name - Task duration - Task start date - Task end date - Predecessor(s) - Activity number (as a custom field for MS Project) - Category (as a custom field for MS Project) - Task effort (as a custom field for MS Project)
Import to Microsoft Project XML	<p>This action is available on both drafts and published plans to import an MS Project XML file.</p> <p>When importing on a published plan, a draft will automatically be created which can then be published manually.</p>

Fields as Category and Task effort are shown as custom fields in MS Projects. Category will show a dropdown with categories used on the exported plan.

Task Information

General | Predecessors | Resources | Advanced | Notes | Custom Fields

Name: Duration: ☐ Estimated

Custom Fields

Custom Field Name	Value
Activity number (Text2)	00454
Category (Text1)	<div>Apprentice</div>
Hierarchy task Id (Text3)	
Task effort (Text4)
